Fully equipped service vehicle will travel
Regular trips to Perth, repairs & purchase of parts
Hydraulic hose assembly made to order, in-house
Mobile hose and fitting trailer for onsite repair

For Sale: 4 Function remote control receiver \$486.00 plus GST, control by a downloadable App IOS or Android which can be loaded on to multiple devices and paired via Bluetooth.

Features

- Easy connection of smartphone & receiver
- Easy control and menu guidance
- Creation of personal user interfaces
- Programming of up to 24 smartphones / receivers

The product's purpose is to switch electric loads ON and / or OFF. The end user is able to switch a load ON and / or OFF by using a mobile iOS or Android App, which connects the smart device via Bluetooth to the ICARUS blue receiver.

By touching the buttons in the main screen of the mobile app, the corresponding output will be activated or deactivated.

The product is designed to work with 12 and 24 Volt systems and has a maximum current capacity of 4.7 Amps per out-put. The load of the whole system may never result in exceeding a total maximum current of 10 Amps.

The ICARUS blue receiver has an internal memory to store the app settings. When another user connects his / her smart device to the receiver, the saved settings will be loaded automatically.
